

Clean on the move: hygiene recommendations

For a safe and healthy elevator ride

Please take note of the following guidelines:

- ✓ **Keep a reasonable distance** from other passengers in the elevator and if in doubt, take the next lift.
- ✓ If possible, **take the elevator alone** to minimize the risk of infection.
- ✓ If you need to touch the panel buttons or handrail, **avoid direct contact with your hands** and use a handkerchief or jacket sleeve.
- ✓ If you have to sneeze or cough, try to suppress this until you get out and **sneeze or cough into a handkerchief or the crook of your arm.**
- ✓ **Avoid touching the elevator doors** if possible.

- ✓ **Avoid placing packages on the ground** as there might be germs on the floor.
- ✓ The general rule is: **wash your hands regularly** or **use disinfectant gel** when you're on the go.

Stay healthy!
